

## **Once upon a time**

Once upon a time we were asked to design a room in an extraordinary house. A 16th century mansion in a beautiful garden with a long history made us feel like we stepped into a fairy tale. No wonder this became the theme for the design.

For this room we designed 10 pieces all based on different fairy tales, or themes from fairy tales, such as: the secret room, genie in a bottle, princess on the pea, sleeping beauty, etc.

All the pieces are made in The Netherlands, most of them in our own workshop, some of the pieces were made in other workshops like the glass museum, the textile museum and the metal factory. We used techniques as embroidery, glass blowing, laser cutting, weaving, cnc cutting, and many more. Leading colour is green, together with natural material and colours.
