

# TALLOW

## PRODUCT MANUAL

Never leave candles burning unattended.

The wick should be around 10 millimeters. Candles with a long wick can smoke and flare. Cut the wick with a scissor when it's too long.

Always use a non-flammable protector. (e.g. coaster)

Place the candle in a straight position.

Extinguish the candle with a candle snuffer.

Don't place candles in the sunlight or near heat source such as, heating or fireplace.

Never place candles on a flammable surface or near flammable materials such as curtains.

Don't place candles near a fan, open window or doorway. Candles that are standing in draft smoke and drip.

made in The Netherlands
